

Bendigo Art Gallery, Victoria

Tract Consultants worked with architects Nation Fender Katsalides in the re-development of the Bendigo Art Gallery. The historic building was hidden from view by a cream brick building of poor quality. The removal of the building and creation of a Garden and Sculpture Court has transformed the Arts Precinct on historic View Street, site of the First Constitution. An amphitheatre was formed about the central axis of Constitution Circle creating a symbolic setting.

The sculpture Court, which forms part of the entry experience to the Gallery, is a simple composition of formal planting, gravel paving and granite seats. A second stage at the Gallery development is currently under way with a Restraint and Sculpture Garden linking with Roslyn Park at the rear.
