WINNER CITATION

Delivered Outcome - Large Scale

NORTHERN BUSWAY (WINDSOR TO KEDRON)

**By: Tract Consultants, PBAJV, Thiess John Holland, Transport and Main Roads,
Cottee Parker Architects, Bligh Tanner, Hydroplan, Dotdash, Holistic Trees**

This project has been awarded for their visionary series of transport nodes along a six kilometre corridor, integrating effective site- specific solutions into the existing urban fabric. This transformational project, a catalyst for urban transformation around public transport, highlights the potential for greater value and density around transport-orientated development and leaves a long term legacy for the City of Brisbane.

Using a multi-disciplinary approach, and considering many different criteria in a complicated brief, the project team used the network of connections - and reconnections – between pedestrian, cycle paths, public transport and roadways to create significant transformation and a precedent for future multi modal exchanges. Previously degraded spaces, from the waterway to the zones under transport corridors, have been re-integrated to deliver exemplary urban design with a common and unifying theme.

The richness of the hard and the soft landscaping within the natural topography, and the quality of the design and installation, aims to maximise user satisfaction, improve the experience, and liberates the “functional form” so it can become an integral part of the social and urban fabric.
